Data-NFT and Hub Console

The **Hub Console** is a system that allows a **Data-NFT** to be connected to the **inPersona** app allowing the user to trace their mining and rewards.

Hub Console	Pro
Number of Hubs	2
Slots per Hub	Unlimited
HealthFi Personal	Enabled
HealthFi Connections	25%
SocialFi Connections	10%
HealthFi Community	10%
SocialFi Community Pool	3.5%

Please note: Eligibility for the HealthFi Personal Reward is not based on the possession of a Console, but rather on the level of your Data-NFT. If you only have a Console and no Data-NFT, you will not have access to the HealthFi Personal Reward

3 EARN

HealthFi
Personal Reward

Earning the $VSC (Vyvo Smart Coin) reward in the **HealthFi program** requires a **Helo wearable device** and an activated **Data-NFT** by inPersona.

The more you use your device, the more you can mine!
Your mining power is related to your Data-NFT level.

	Data-NFT Basic	Data-NFT Lev1	Data-NFT Lev2	Data-NFT Lev3	Data-NFT Lev4
Max Efficiency	50%	60%	90%	100%	150%
Data Frequency	6 Hours	3 Hours	1 Hour	30 Minutes	30 Minutes
Max Data Blocks	2	8	24	48	48
On Demand Data Blocks	No additional data block	No additional data block	Up to 4 additional data blocks	Up to 10 additional data blocks	Up to 16 additional data blocks

Please note: The Data-NFTs are randomly generated so the colors and design do not depict the level - the user will get one that is unique to them.

3 EARN

HealthFi
Community Reward

Earn up to **10% of the PAYABLE $VSC** mined by your Community in your Hubs.

The **payable $VSC** is calculated using the following formula:

Hub A + Hub B - Delta = Payable amount

Total $VSC = Total $VSC Hub A + Total $VSC Hub B

Delta $VSC = Total $VSC Hub A - Total $VSC Hub B

PAYABLE $VSC = Total $VSC - Delta $VSC

SocialFi
Community Pool Reward

Get your slice of the production coming from your community.

This is a type of reward pool in which users participate based on their connections' sub-community production. The calculation of users' Shares is as follows:

Total USDV = Total USDV Hub A + Total USDV Hub B

Delta USDV = Total USDV Hub A - Total USV Hub B

PAYABLE USDV = Total USDV - Delta USDV

Payable USDV is multiplied by 3.5% to determine users' Shares, which is then multiplied by a specific value established by inPersona at the end of each epoch. For example, if you have 500 Shares and the value is 1 USDV, you receive 500 USDV. If the value is 0.95 or 1.10, your final USDV will be adjusted accordingly.

Generation
Future Makers

Feel the power of community shopping like never before. Transform the way you earn with Vyvo SocialFi OdeePay Reward!

The Future of Shopping

Welcome to the world’s first SocialFi OdeePay Reward program, exclusively from Vyvo.

Revolutionary Earnings

Be the first to tap into a global rewards system that pays you when others shop! Community-Powered

Rewards

Your entire circle’s spending becomes your personal treasure trove. Instant USDV

Accumulation

See your USDV grow with every swipe and click from your community.

Global Reach

Doesn’t matter if your friends shop in Tokyo or Toronto. You still earn!

No Limits

The bigger your community, the bigger your rewards. Sky's the limit!

Zero Hassle

Just connect your VyvoPay or OdeePay, and watch your rewards stack up. No extra steps required!

No Exclusions

From morning coffee at your favorite cafe to midnight online shopping sprees, it all counts!

Please note: *that ATM withdrawals are not eligible for the Vyvo SocialFi OdeePay Reward program.*

Rewards Example

COMMUNITY SPEND	YOUR REWARD
US$10-19	1 USDV
US$20-29	2
US$30-39	3
US$40-49	4
US$50-59	5

*You Earn 1 USDV in OdeePay Community Reward for every US$10 in transactions that your community spends using their OdeePay/VyvoPay. This means US$19 in transactions still equals 1 USDV, but US$20 in transactions equals 2 USDV, and so forth.

SKY'S THE LIMIT!

Please note: *that ATM withdrawals are not eligible for the Vyvo SocialFi OdeePay Reward program.*
